

EKODUR

**THE BEST FOR
INDOOR USE**

Patrick, Craftsman Paint Production

WATER-BASED PAINT

The RIGO Verffabriek paint makers managed to develop a full assortment of water-based paints that can be used like solvent-based paints, but aren't the same in the slightest. That is why they will always retain their brilliant white colour. It's like magic, isn't it? For a real Masterpiece, you should therefore choose the Best Product for Indoor Use: **EKODUR Water-based Paint.**

EKODUR

EKODUR

THE BEST FOR INDOOR USE

FOR A BRILLIANTLY WHITE INTERIOR

Painters about EKODUR:

"Easy to apply, excellent flow"

"Doesn't slip under your brush"

"I'm impressed"

"Wonderfully matte"

Permanently brilliant white

Thanks to a specific choice of raw materials, EKODUR Lacquer Interior stays permanently white.

Handfat resistant and remarkably scratch proof

Do you always use the handle when touching a door? We didn't think so. That is why we developed EKODUR Lacquer 2K, with excellent handfat and scratch resistance. This means this paint can also be used for bannisters and stairs.

Emulsion Lacquer with unique properties

Made of natural oils, resins and water (which means it's bio based), we created the glossiest finish ever seen in water-based paint! Light colours will discolour a little in the dark, but the high gloss is absolutely unrivalled.

Complete assortment

We made a masterful product for each interior application. Easy to apply, from a Matte to a High Gloss finish and from Primer to Varnish. With EKODUR, you've got it all.

WE MAKE

**PAINT
LAQUER
& OIL**

**RIGO Verffabriek
(Paint factory)
since 1938**

RIGO Verffabriek is a Dutch family company making paint, oil and lacquer products since 1938. From the very beginning, we do this in the city of IJmuiden, a vigorous seaport town with beaches, ships, dunes and industry, and a no-nonsense character.

Our goal is to manufacture our products in the most honest and progressive way. That's why we use renewable raw materials wherever possible, making innovative products. The result of this are the renowned SKYLT technology, ROYL solvent-free oils, STEP water-based lacquers, EKODUR professional paint, and TOPLIN linseed stand oil paint, for example. This is just a small selection of our assortment.

For us, making paint is real human work. That's something we're proud of. That is why we can say: RIGO Verffabriek is a platform created for and by craftsmen. Together, we make the most beautiful products. Together, we make Masterpieces.
