

SKYLT

BE ORIGINAL

Ruud, Craftsman Lacquer Production

FOR THOSE WHO LOVE PURE WOOD

Our masters of lacquer crafting at RIGO Verffabriek (RIGO paint factory) were looking for a way to protect and maintain the untreated raw look of wood. The result is SKYLT. With SKYLT, wood stays pure wood. SKYLT protects the original and affirms the raw aesthetics. SKYLT has been unrivalled since 2003. That is why those who love pure wood choose to **BE ORIGINAL. SKYLT.**

Unrivalled since 2003

SKYLT is a unique protection. Due to its characteristics of invisibility and natural untreated look, it keeps the wood like it is untreated and freshly sanded. Especially developed for craftsmen who love to maintain the characteristics of their work.

Invisible under every angle

SKYLT is certainly the most invisible parquet varnish available, as matt as only freshly sanded wood will be. At whatever angle or with whatever light source you look, you won't see a film or varnish.

Phenomenal transparency

SKYLT is so transparent that wood, cork and other (even mineral) substrates retain their natural look. Even applied in multiple layers, you won't see SKYLT.

Indestructible

SKYLT is a 2-component polyurethane varnish and it is extremely durable and wear-proof due to its solid content. It is a perfect finish for heavy-duty floors and other surfaces.

Easy to apply

After only 3 - 4 hours the second coat of SKYLT can be applied, and intermediate sanding may only be done before the last coat. You don't need to sand for better adhesion, it's only for the aesthetic result and smooth surface.

Certification and standardization

SKYLT is water borne and complies with the most recent EU standards and VOC-standards. It is Indoor Air Quality Certified, with also an A+ label.

For much more than wood

SKYLT is suitable for the most diverse substrates.

SKYLT ORIGINAL

- Absolutely invisible.
- Lightly bleaching effect, for oak and light-coloured wood.
- Gives wood a natural appearance and maintains the colour of the original substrate.
- Makes surfaces suitable for intensive use.
- Available in 4, 1 and 0,5-litre units.

You can easily reach us on our **WhatsApp** number **+31 (0)6 47 05 78 24** on working days between 8.00 am and 05.00 pm (CET) for immediate advice or support. If you send us some pictures, our advisors will take a look at them right away and call or message you their recommendations.

WE MAKE

**PAINT
LAQUER
& OIL**

**RIGO Verffabriek
(Paint factory)
since 1938**

RIGO Verffabriek is a Dutch family company making paint, oil and lacquer products since 1938.

From the very beginning, we do this in the city of IJmuiden, a vigorous seaport town with beaches, ships, dunes and industry, and a no-nonsense character. Our goal is to manufacture our products in the most honest and progressive way. That's why we use renewable raw materials wherever possible, making innovative products. The result of this are the renowned SKYLT invisible protection, ROYL solvent-free oils, STEP water-based lacquers, EKODUR professional paint, and TOPLIN linseed stand oil paint, for example. This is just a small selection of our assortment.

For us, making paint is real human work. That's something we're proud of. That is why we can say: RIGO Verffabriek is a platform created for and by craftsmen. Together, we make the most beautiful products.

Together, we make Masterpieces.
