

STEP

LACQUER SIMPLE AS CAN BE

EASY, SPLASH-FREE
AND NO ROLLER MARKS

Ger, Laboratory Master

Parquet lacquering requires skill, as does the making of lacquer itself. That's why our producers work closely with our parquet fitters. The result of this is our range of easy-to-use STEP lacquers. No further explanation is needed: just shake and apply. It's that simple.

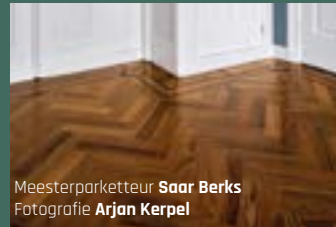

STEP Parquet lacquers are
Indoor Air Quality Certified

STEP LACQUER SIMPLE AS CAN BE

EASY, SPLASH-FREE
AND NO ROLLER MARKS

While lacquering floors is a real profession, we don't want to make it any harder than it is. That's why we've developed the STEP Parquet lacquers. While it's obvious for us to select sustainable, responsible raw materials, we developed our parquet lacquers with biobased binder and we ensured the hardeners in the STEP Parquet Lacquer 2K are isocyanate-free, without compromising the varnish's exceptional performance. Floors finished with STEP are surprisingly easy to maintain, and only require a quick clean using the STEP Mild Cleaner.

WE MAKEN

**VERF
LAK
& OLIE**

RIGO Verffabriek since 1938

RIGO Verffabriek (Paint Factory) is a Dutch family firm that has been making paint, oil and varnish products since 1938. From day one we've been doing all this in IJmuiden, a rugged seaport with beaches, ships, dunes and industry, characterised by a spirit of getting on with things and saying what you have to say.

We strive to be as honest and progressive as possible, which helps us make innovative products using as many renewable raw materials as possible. The result is our now-renowned SKYLT invisible protection, ROYL solvent-free oils, STEP water-based paints, EKODUR professional paint and, for example, TOPLIN linseed oil stand paint. And these are just a handful from our complete range.

To us, making paint is real human work and we're proud of it. That's why we can say: RIGO Verffabriek is a platform created by professionals for professionals. Together, we create the best products. We make masterpieces.
