

ROYL Floor Soap #9130 Clear, #9131 White

Technical Data Sheet

Product description

Concentrated, mildly scented, water-based cleaner based on vegetable raw materials.
Biodegradable.

For regular cleaning of surfaces treated with ROYL oil and/or ROYL Rollable Hardwax Oil. Leaves a nourishing layer of soap after each treatment. ROYL Floor Soap is easy to use. Add to mopping water, do not use undiluted.

Available in Clear #9130 and White #9131.

Formerly Aquamarine Clean-Z.

Product specifications

	Packaging	Bottle 1 litre.
	Yield	Approximately 20 treatments per litre.
	Mixing ratio A:B	Approximately 50 ml of Floor Soap to 5 litres of warm water.
	Cleaning with	Clean spilt material and tools with plenty of water before drying.
	Temperature during application	Room and floor temperature above 5°C.
	Relative humidity during application	> 80% RH.
	Drying time	Approx 45 minutes. Drying time applies at 20°C and 65% RLV, normal application and sufficient ventilation. Allow longer drying times under unfavourable conditions.
	Resilient after	After complete drying. Do not walk on the floor until the surface is completely dry.
	Natural materials	99.7% This is total quantity of renewable resources + water + mineral materials.
	VOC content	This product contains 0 g/l VOC. Meets ARBO (NL) for professional indoor use.
	Density	1.02 to 1.04 kg/l according to ISO 2811.
	pH value	10
	Storage, transport and shelf life	Store and transport cool and dry, but frost-free in tightly closed packaging. Can be stored for at least 12 months in tightly closed original packaging. Limited shelf life after opening.

Surface and preparation

Remove dust and loose dirt from the surface.

Application

ROYL Floor Soap - especially the white one - should be shaken well before use. Add approx 50ml of ROYL Floor Soap to a bucket of 5 litres of lukewarm water. Fill another bucket with clean water.

Use two buckets: one with the soap solution and the other with clean water to rinse out the mop.

Make the surface slightly damp (not soaking wet) with the soapy water, leave to soak for a minute and then clean by rubbing with light pressure. Then, at least before drying, remove the dirty water from the floor by wiping backwards.

Rinse the mop in the bucket with clean water. Change the rinse water regularly. Do so whenever the water becomes too foaming or dirty.

To apply a nourishing layer of soap, wet the just mopped area again with well wrung-out mop from the bucket of soapy water.

Tip: Alternating use of ROYL Floor Soap and ROYL Mild Cleaner avoids excessive build-up of the soap film.

Other

- If heavily soiled, clean thoroughly with ROYL Intensive Cleaner #9120 and then top up the surface with oil.
- Never use a steam cleaner on wooden surfaces.

Waste

Bottles with undiluted cleaner can be disposed of as residual waste. Diluted soap according to the specified mixing ratio can be disposed of via the sewer.
