

TOPLIN

LINSEED OIL STAND OIL PAINT

FOR CURRENT
AND FUTURE HERITAGE

Magda, Laboratory Master

Linseed Stand Oil Paint is on the rise. This is thanks to its environmentally friendly and sustainable aspects on the one hand, and its unrivalled technical properties on the other. There's a good reason why we still encounter coats of linseed oil paint in monumental buildings that are still intact after hundreds of years. For monuments, linseed oil paint has proven itself as wood protection over and over for hundreds of years. RIGO Verffabriek is therefore presenting TOPLIN linseed stand oil paint for outdoor use and now, as a novelty, the technical masterpiece TOPLIN Aqua Linseed Stand Oil Paint for indoor use. High-grade painters' quality linseed oil paint

TOPLIN AQUA

LINSEED OIL PAINT FOR INDOOR USE

FOR CURRENT
AND FUTURE HERITAGE

Innovation and modernisation

For centuries, linseed oil paint has been used for wood protection. Until the introduction of synthetic lacquers in the 1920s, linseed oil paint was the norm. When it comes to protection, it turns out that linseed oil paint still performs excellently. There is a good reason why heritage owners increasingly use this type of paint.

Until now, as a result of modern laws, it was not possible to use linseed oil paint for indoor projects. Since synthetic paint isn't really an option for monuments, the master paint makers and laboratory staff of RIGO Verffabriek have worked hard for four years to develop a water-based linseed oil paint that meets the legal requirements for indoor use. Using natural raw materials, they developed a quick-drying and robust linseed oil binding agent that can be emulsified in water. As a result, RIGO is now the first paint factory to release a top-quality water-based linseed stand oil paint.

That way, even the indoor paintwork of current and future heritage can be finished with linseed oil paint.

Meet TOPLIN AQUA:

- 100% solvent-free
- Water-based
- 95% natural raw materials

LACQUER AQUA

- Unique linseed oil recipe for indoor use
- Ideal for historical indoor paintwork
- Available in High Gloss and Satin finish
- Based on natural resins and oils
- 95% natural raw materials
- 100% solvent-free and water-based
- Meets the highest standard of the Swiss Umwelt-Etikette

HISTORICAL INDOOR PAINTWORK WITH LINSEED OIL PAINT

DUTCH LINSEED OIL

CURRENT AND
FUTURE HERITAGE
PAINTED SUSTAINABLY

Since 2013, we have grown our own Linseed oil on fallow fields in the Randstad area. In collaboration with farmers from the area, we work at a local level. The historical oil mills at the Zaanse Schans “crush” the linseed oil for us. This way, we produce every year 30% of the linseed oil we need ourselves. In addition to its excellent technical properties, the TOPLIN Aqua paint is made of at least 95% natural, non-synthetic raw materials. It goes without saying that the TOPLIN Aqua products meet the requirements of the EU Ecolabel and the highest standard of the Swiss Umwelt-Etikette.

TOPLIN AQUA

PRIMER AQUA

- Linseed oil Emulsion Primer for indoor use
- A perfect foundation for a linseed oil paint system thanks to its excellent penetration
- Can be combined with TOPLIN Linseed oil Pre-Lacquer Aqua
- Recoatable after 24 hours
- 95% natural raw materials
- 100% solvent-free and water-based
- Available in virtually any colour

LINSEED OIL
PRIMER FOR
INDOOR USE

WE MAKE

**PAINT
LAQUER
& OIL**

**RIGO Verffabriek
(Paint factory)
since 1938**

RIGO Verffabriek is a Dutch family company making paint, oil and lacquer products since 1938. From the very beginning, we do this in the city of IJmuiden, a vigorous seaport town with beaches, ships, dunes and industry, and a no-nonsense character.

Our goal is to manufacture our products in the most honest and progressive way. That's why we use renewable raw materials wherever possible, making innovative products. The result of this are the renowned SKYLT technology, ROYL solvent-free oils, STEP water-based lacquers, EKODUR professional paint, and TOPLIN linseed stand oil paint, for example. This is just a small selection of our assortment.

For us, making paint is real human work. That's something we're proud of. That is why we can say: RIGO Verffabriek is a platform created for and by craftsmen. Together, we make the most beautiful products. Together, we make Masterpieces.
